Pune, Maharashtra, India

## Profile

Dedicated software developer skilled in building responsive web applications with React, JavaScript, and modern CSS frameworks. Experienced in API integration, state management, and improving UX/UI. Proven ability to deliver quality code in fast-paced environments.

## Experience

### Softtron Software Company, Kolhapur (Intern - Web Developer)

July 2023 – Dec 2023

Project: Grocery Store | HTML, CSS, JavaScript, Bootstrap

Kolhapur, Maharashtra

- Developed responsive e-commerce web interfaces with clean, maintainable code.
- Implemented cart functionality and localStorage for persistent user sessions.
- Collaborated on debugging, refactoring, and optimizing front-end performance.

## Projects

Netflix Clone | React, Tailwind CSS, Redux, TMDB API

- Built responsive Netflix-Clone UI using React and Tailwind CSS.
- Integrated TMDB API for real-time movie and TV show data.
- Managed global state with Redux for user and media data.

Anime Finder | React, Tailwind CSS, Redux, React Router, Jikan API

- Developed anime discovery app with search, category filtering, and smooth navigation.
- Fetches and displays live anime data using Jikan API and Redux state management.
- Implemented mobile-friendly UI with reusable components and conditional styling.

Food Villa | React, Tailwind CSS, Redux, Swiggy's API

- Designed food ordering platform with React and Tailwind CSS for responsive experience.
- Managed cart and user state globally with Redux for seamless interactions.
- Used localStorage to persist cart data, improving UX across sessions.

Weather App | HTML, CSS, JavaScript, Bootstrap, API

- Developed responsive weather app with live data integration using OpenWeatherMap API.
- Displayed temperature, humidity, and weather conditions dynamically with clear UI.
- Enhanced user experience through smooth design and intuitive interface.

## Education
